

Clamp cylinder CAC4 Series Position locking clamp cylinder UCAC2 Series

Clamp cylinder CAC4 series/Position locking clamp cylinder UCAC2 Series

The Height of "Light"

Clamp cylinder

CAC4 Series

Bore size: $\varnothing 40$, $\varnothing 50$, $\varnothing 63$, $\varnothing 80$

- Optimal cover design for a slim and light product.
- Minimal needle projection for easier adjustment and safety.
- Spatter adherence prevention type CAC4-G4 series is also available.

Position locking clamp cylinder

UCAC2 Series

Bore size: $\varnothing 50$, $\varnothing 63$

- Free position locking mechanism is equipped for CAC4 series.
- Cylinder can be locked in any position if it is not moving.
- Lock reverse direction is free.

Our pursuit of weight reduction contributes to reducing the load on the welding jig.

Slim & Light Weight

RoHS RoHS directive complied
All substances that can adversely affect the environment, including lead and hexavalent chrome, have been eliminated.

Safety precautions

Always read this section before starting use.

When designing and manufacturing a device using CKD products, the manufacturer is obligated to check that device safety and mechanism, pneumatic or hydraulic control circuit and the system operated by electrical control that controls the devices is secured.

It is important to select, use, handle, and maintain the product appropriately to ensure that the CKD product is used safely. Observe warnings and precautions to ensure device safety.

Check that device safety is ensured, and manufacture a safe device.

WARNING

- 1** This product is designed and manufactured as a general industrial machine part.
It must be handled by an operator having sufficient knowledge and experience in handling.
- 2** Use this product in accordance of specifications.
This product must be used within its stated specifications. It must not be modified or machined.
This product is intended for use as a general-purpose industrial device or part. It is not intended for use outdoors or for use under the following conditions or environment.
(However, if CKD is consulted prior to use and the customer consents to CKD product specifications, then the product may be used under conditions not intended. In that case, the customer must provide safety measures to avoid risks in the event of failures.)
 - ① Use for special applications including nuclear energy, railway, aircraft, marine vessel, vehicle, medical devices, devices coming into contact with beverages or foodstuffs, amusement devices, emergency cutoff circuits (cutoff, open, etc.), press machines, press circuits, or safety devices.
 - ② Use for applications where life or assets could be adversely affected, and special safety measures are required.
- 3** Observe corporate standards and regulations, etc., related to the safety of device design and control, etc.
ISO4414, JIS B8370 (pneumatic system rules)
JFPS2008 (principles for pneumatic cylinder selection and use)
High Pressure Gas Maintenance Law, Occupational Safety and Sanitation Laws, other safety rules, body standards and regulations, etc.
- 4** Do not handle, pipe, or remove devices before confirming safety.
 - ① Do not inspect or service equipment/machinery until safety is confirmed on the entire system related to this product.
 - ② Note that there may be hot or charged sections even after operation is stopped.
 - ③ When inspecting or servicing the device, turn off the energy source (air supply or water supply), and turn off power to the facility. Discharge any compressed air from the system, and pay maximum attention to possible leakage of water and electricity.
 - ④ When starting or restarting a machine or device that incorporates pneumatic components, make sure that the system safety, such as pop-out prevention measures, is secured.
- 5** Observe warnings and cautions on the pages below to prevent accidents.

■ The precautions are ranked as "DANGER", "WARNING" and "CAUTION" in this section.

-  **DANGER:** When a dangerous situation may occur if handling is mistaken leading to fatal or serious injuries, or when there is a high degree of emergency to a warning.
-  **WARNING:** When a dangerous situation may occur if handling is mistaken leading to fatal or serious injuries.
-  **CAUTION:** When a dangerous situation may occur if handling is mistaken leading to minor injuries or physical damage.

Note that some items described as "CAUTION" may lead to serious results depending on the situation. In any case, important information that must be observed is explained.

Limited warranty and disclaimer

- 1** Term of warranty
"Warranty Period" is one (1) year from the first delivery to the customer.
- 2** Scope of warranty
In case any defect attributable to CKD is found during the term of warranty
This limited warranty will not apply to:
 - (1) Product abuse/misuse contrary to conditions/environment recommended in its catalogs/specifications.
 - (2) Failure due to other causes.
 - (3) Use other than original design purposes.
 - (4) Third-party repair/modification
 - (5) Failure due to causes not foreseeable with technology at the time of delivery.
 - (6) Failure attributable to force majeure.In no event shall CKD be liable for business interruptions, loss of profits, personal injury, costs of delay or for any other special, indirect, incidental or consequential losses costs or damages.
- 3** Compatibility confirmation
In no event shall CKD be liable for merchantability or fitness for a particular purpose, notwithstanding any disclosure to CKD of the use to which the product is to be put.

Pneumatic components

Safety precautions

Always read this section before starting use.

Please refer to "Pneumatic Cylinders I" for further details on cylinder switches and cylinders in general.

Specific precautions: Clamp cylinder CAC4 series, position locking clamp cylinder UCAC2 series

Design & Selection

1. Spatter adherence prevention type CAC4-G4

⚠ WARNING

■ This cylinder series has improved durability over the general-purpose cylinder in atmospheres where spatter could occur, but durability may be shorter than the general cylinder when used in other environments.

2. Double acting UCAC2

⚠ CAUTION

■ Basic circuit diagram

The built-in metering valve eliminates the need to install a speed controller. However, both the meter-in and meter-out states are metered so even if one needle is adjusted, the advance and retract speeds will both change. To control the advance and retract speeds individually, a speed controller must be installed.

● Forward lock F type

● Backward lock B type

■ The UCAC2 piping port position may be changed in the same way as the CAC4 Series, but check the pressure port when making changes.

- When setting port position to the right side (Lock direction F1 is a right side as standard.)

Port	Port A	Port B	Port C
Lock direction			
Forward lock F type Note 1	PUSH side Port	PULL side Port	Plug
Backward lock B type	Plug	PULL side Port	PUSH side Port

Note 1: Locking direction F2 type has a by-pass tube so the port cannot be changed to the right side.

- When setting port position to the left side

Port	Port A	Port B	Port C
Lock direction			
Forward lock F type Note 1	PUSH side Port	PULL side Port	Plug
Backward lock B type	Plug	PULL side Port	PUSH side Port

Note 1: Locking direction F type has a by-pass tube so the port cannot be changed to the left side.

■ Do not mistake the speed adjustment needle for the cushion needle.

Installation & Adjustment

1. Double acting UCAC2

⚠ WARNING

- Do not disassemble the unit, since this may be hazardous.

⚠ CAUTION

- Before connection, flush the pipes sufficiently to prevent foreign matter and cutting chips, etc., from entering the cylinder.

- Check that load is applied axially to the piston rod.
- Handle carefully to prevent scratching or denting the piston rod sliding section. Rough handling could damage packing seal and result in air leaks.

During Use & Maintenance

1. Double acting UCAC2

⚠ WARNING

- For safety reasons, prevent the load from dropping under its own weight during maintenance.

⚠ CAUTION

- The cushion absorbs kinetic energy that the piston acquires using air compressibility, and prevent the piston and cover from colliding at the stroke end. The cushion is not used to decelerate the piston near the stroke end.

The table below shows the kinetic energy that can be absorbed by the cushion. If kinetic energy exceeds these values, or if bouncing caused by air compressibility is to be avoided, consider using another shock absorber.

$$\text{Kinetic energy (J)} = \frac{1}{2} \times \text{Mass (kg)} \times \{\text{Speed (m/s)}\}^2$$

Cushioning characteristics table

Bore size (mm)	Effective cushion length (mm)	Allowable energy absorption (J)	
		Cushioned	No cushion
ø50	13.5	6.54	0.14
ø63	13.5	11.63	0.21

- Do not apply torque to the rod when locked as the holding force could drop and cause danger. Use a mechanism that does not rotate the rod.
- When releasing the lock, supply pressure to port B, and release brakes after the load is removed from the locking mechanism. If pressure is supplied to port A when both ports A and B are exhausted and the piston is locked, the lock may not be released or the piston rod may pop out even if the lock is released. This can be extremely hazardous.

- The lock may be released if the cylinder is held while pressure is applied on the lock mechanism. Do not use a 3-position closed center or 3-position P/A/B port connection solenoid valve.
- If a back pressure is applied while locked, the lock may be released. Use a discrete solenoid valve for brake release, or use an individual exhaust type manifold.
- Do not use with the by-pass tube disconnected as lock response could be delayed.
- Note that due to the structure, a 1mm deviation may occur in stopping the lock.
- How to unlock manually
 - Remove dust cover A.
 - Screw the M4 hexagon socket head cap screw (length 40 or more) into the lock metal screw.
 - The rod is freed when the hexagon socket head cap screw is tilted in the direction of the arrow.

T type switch installation and movement method

How to install the product

- (1) Pass the spring and plain washers through the slotted hexagon head bolt, and set the holder.
- (2) Fit the bracket onto the cylinder tie rod and tighten the slotted hexagon head bolt with a tightening torque of 0.5 to 0.7N·m.
- (3) Finally, tighten the hexagon socket head set screw with a tightening torque of 1.7 to 2.0N·m.

Movement

- ① Fine adjustment
Loosen the slotted hexagon head bolt, and move only the switch. Tighten the bolt at the required position with a tightening torque of 0.5 to 0.7N·m.
- ② Rough adjustment
Loosen all the slotted hexagon head bolt and set screw, and move the entire bracket to the required position. Tightening torque is 0.5 to 0.7N·m.
Then, tighten the set screw with a tightening torque of 1.7 to 2.0N·m.

Installing and moving the H switch

How to install the product

- (1) Pass the plain and spring washers through the slotted hexagon head bolt, and fit onto the switch holder oval hole and then into the bracket.
- (2) Fit the bracket onto the cylinder tie rod and tighten the slotted hexagon head bolt with a tightening torque of 1.5 to 1.9N·m.
- (3) Finally, tighten the setscrew. Tightening torque is 1.7 to 2.0N·m.

Movement

- ① Fine adjustment
Tightening torque is 1.5 to 1.9N·m.
- ② Rough adjustment
Finally, tighten the setscrew. Tightening torque is 1.7 to 2.0N·m.

Clamp cylinder Double acting single rod type

CAC4 Series

● Bore size: ø40, ø50, ø63, ø80

Specifications

Descriptions	CAC4			
	ø40	ø50	ø63	ø80
Bore size mm	ø40	ø50	ø63	ø80
Actuation	Double acting			
Working fluid	Compressed air			
Max. working pressure MPa	1.0			
Min. working pressure MPa	0.1			
Withstanding pressure MPa	1.6			
Ambient temperature °C	5 to 60			
Port size	Rc1/4			Rc3/8
Standard stroke length mm	50, 75, 100, 125, 150			
Working piston speed mm/s	50 to 500	50 to 400	50 to 300	
Cushion	Head end air cushioned			
Effective cushion length mm	13.5			
Lubrication	Not required (when lubricating, use turbine oil ISO VG32.)			
Mounting style	Clevis			

* Use within the absorbed energy. Refer to the below table.

Stroke length

Bore size (mm)	Standard stroke length (mm)	Max. stroke length (mm)	Min. stroke length (mm)	Min. stroke length with switch (mm)
ø40	50, 75 100, 125 150	150	50	50
ø50				
ø63				
ø80				

Note: Stroke length that is not standard is custom order.

Cushioning characteristics table

Bore size (mm)	Effective cushion length (mm)	Allowable energy (J)	
		Cushioned	No cushion
ø40	13.5	5.14	0.137
ø50	13.5	6.41	0.137
ø63	13.5	11.37	0.205
ø80	15.4	25.4	0.360

● Cushion

The cushion absorbs kinetic energy that the piston acquires using air compressibility, and prevents the piston and cover from colliding at the stroke end. The cushion is not used to decelerate the piston near the stroke end.

The left table shows the kinetic energy that can be absorbed by a cushion. If kinetic energy exceeds these values or bouncing by air compression needs to be avoided, consider using another shock absorber.

$$\text{Kinetic energy (J)} = \frac{1}{2} \times \text{Mass (kg)} \times \{\text{Speed (m/s)}\}^2$$

Cylinder weight

(Unit: kg)

Bore size (mm)	Product weight when stroke length = 0mm	Additional weight per stroke length = 10mm	Accessory weight				
			Axial foot	Rod clevis	Rod eye	Limit switch mounting bracket	Dog bracket
ø40	0.75	0.34	0.21	0.37	0.27	0.18	0.08
ø50	0.82	0.36					
ø63	1.03	0.39					
ø80	2.80	0.60	-	0.95	-	-	-

(Example) Product weight of CAC4-A-40-150-Y

- Product weight when stroke length = 0mm 0.75kg
- Additional weight when stroke length = 150mm $0.34 \times \frac{150}{100} = 0.51\text{kg}$
- Accessory weight (rod clevis) 0.37kg
- Product weight $0.75 + 0.51 + 0.37 = 1.63\text{kg}$

CAC4-G4 Series

● Bore size: ø40, ø50, ø63, ø80

JIS symbol

Specifications

Descriptions	CAC4-G4/CAC4-G4L2			
Bore size mm	ø40	ø50	ø63	ø80
Actuation	Double acting			
Working fluid	Compressed air			
Max. working pressure MPa	1.0			
Min. working pressure MPa	0.1			
Withstanding pressure MPa	1.6			
Ambient temperature °C	5 to 60			
Port size	Rc1/4			Rc3/8
Standard stroke length mm	50, 75, 100, 125, 150			
Working piston speed mm/s	50 to 500	50 to 400	50 to 300	
Cushion	Head end air cushioned			
Effective cushion length mm	13.5			15.4
Lubrication	Not required (when lubricating, use turbine oil ISO VG32.)			
Mounting style	Clevis			

* Use within the absorbed energy. Refer to the below table.

Stroke length

Bore size (mm)	Standard stroke length (mm)	Max. stroke length (mm)	Min. stroke length (mm)	Min. stroke length with switch (mm)
ø40	50, 75 100, 125 150	150	50	50
ø50				
ø63				
ø80				

Note: Stroke length that is not standard is custom order.

Cushioning characteristics table

Bore size (mm)	Effective cushion length (mm)	Allowable energy (J)	
		Cushioned	No cushion
ø40	13.5	5.14	0.137
ø50	13.5	6.41	0.137
ø63	13.5	11.37	0.205
ø80	15.4	25.4	0.360

● Cushion

The cushion absorbs kinetic energy that the piston acquires using air compressibility, and prevents the piston and cover from colliding at the stroke end. The cushion is not used to decelerate the piston near the stroke end.

The table to the left shows the kinetic energy that can be absorbed by the cushion. If kinetic energy exceeds these values or bouncing by air compression is to be avoided, consider using another shock absorber.

$$\text{Kinetic energy (J)} = \frac{1}{2} \times \text{Mass (kg)} \times \{\text{Speed (m/s)}\}^2$$

Cylinder weight

(Unit: kg)

Bore size (mm)	Product weight when stroke length = 0mm	Additional weight per stroke length = 10mm	Accessory weight				
			Axial foot	Rod clevis	Rod eye	Limit switch mounting bracket	Dog bracket
ø40	0.75	0.34	0.21	0.37	0.27	0.18	0.08
ø50	0.82	0.36					
ø63	1.03	0.39					
ø80	2.82	0.60	-	0.95	-	-	-

(Example) Product weight of CAC4-G4-A-40-150-Y

- Product weight when stroke length = 0mm 0.75kg
- Additional weight when stroke length = 150mm ... $0.34 \times \frac{150}{100} = 0.51\text{kg}$
- Accessory weight (rod clevis) 0.37kg
- Product weight $0.75 + 0.51 + 0.37 = 1.63\text{kg}$

Switch specifications

● Strong magnetic field proof proximity

Descriptions	Proximity 2 wire	
	T2YD	T2YDU
Applications	Programmable controller	
Light	Red/green LED (ON lighting)	
Load voltage	24 VDC ±10%	
Load current	5 to 20mA	
Internal voltage drop	6V or less	
Leakage current	1.0mA or less	
Output delay time Note 1 (ON and OFF delay)	30 to 60ms	
Lead wire length	1m (oil resistant vinyl cabtire cable ø6, 0.5mm ² , 2 conductors) Note 2, Note 3	Flame resistant cabtire cord with cable connector 0.5 mm ² , 2 conductors
Insulation resistance	100MΩ and over with 500 VDC megger	
Withstand voltage	1000 VAC impressed for one minute.	
Maximum shock resistance	980m/s ²	
Ambient temperature	-10 to + 60°C	
Protective structure	JIS C0920 (water tight type), IEC standards IP67, oil resistant	

Note 1: The time required for magnetic sensor to release the switch output after detecting the piston magnet.

Note 2: For lead wire length, 3m and 5m are available as an option.

Note 3: For lead wire material, flame resistant type is available as an option.

● Strong magnetic field proof reed

Descriptions	Reed 2 wire		
	HO		HOY (2 color indicator type)
Applications	Programmable controller, relay		Programmable controller
Load voltage	12/24 VDC	110 VAC	24 VDC
Load current	5 to 50mA	7 to 20mA	5 to 20mA
Internal voltage drop	5V or less		6V or less
Leakage current	10 μA or less		10 μA or less
Light	Green LED (ON lighting)		Red/green LED (ON lighting)
Lead wire (standard)	1m (flame resistance cabtire cord ø6, 0.5mm ² , 2 conductors)		
Insulation resistance	100MΩ and over with 500 VDC megger		
Withstand voltage	1000 VAC impressed for one minute.		
Maximum shock resistance	294m/s ²		
Ambient temperature	-10 to + 60°C		
Protective structure	JIS C0920 (water tight type), IEC standards IP67, oil resistant

Dimensions

The dimensions are identical to double acting single rod type. Refer to pages 7 to 10.

Position locking clamp cylinder

UCAC2 Series

● Bore size: $\varnothing 50$, $\varnothing 63$

JIS symbol ● Double acting single rod type

Specifications

Descriptions		UCAC	
Bore size	mm	$\varnothing 50$	$\varnothing 63$
Actuation		Double acting	
Working fluid		Compressed air	
Max. working pressure	MPa	1.0	
Min. working pressure	MPa	0.25	
Withstanding pressure	MPa	1.6	
Ambient temperature	°C	5 to 60	
Port size		Rc1/4	
Standard stroke length	mm	50, 75, 100, 125, 150	
Stroke tolerance		+1.0 0	
Working piston speed	mm/s	50 to 400	50 to 300
Cushion		Head end air cushioned	
Lubrication		Not available	
Installation mounting style		Clevis	
Position locking mechanism		Forward lock or backward lock	
Holding force	N	1470	
Allowable absorption	Cushioned	6.54	11.63
Energy	J No cushion	0.137	0.206

Note: No cushion type can not absorb large energy generated by an external load.
Use of an external shock absorber is recommended.

Stroke length

Bore size (mm)	Standard stroke length (mm)	Min. stroke length (mm)	Max. stroke length (mm)
$\varnothing 50$	50·75·100	50	150
$\varnothing 63$	125·150		

Custom stroke length is available per 1mm increment.

Switch specifications (T type switch)

● 1 color/2 color indicator/strong magnetic field proof

* TO/T5 switches 220 VAC are also available. Consult with CKD for working conditions.

13	Head cover	Aluminum alloy die-casting		32	Plain washer	Steel	Zinc chromate
14	Hexagon nut	Steel	Zinc chromate	33	Split pin	Steel	Zinc chromate
15	Needle	Copper alloy		34	Clevis pin	Steel	Blackening
16	Needle gasket	Nitrile rubber		35	Washer	Steel	PULL side lock (B) time zinc chromate not required
17	Spring pin	Steel	Blackening	36	Dust cover	Aluminum alloy	
18	Rod packing seal	Nitrile rubber		37	Machine screw	Steel	Zinc chromate
19	Bush	Copper					

Dimensions

● Without rod eye/clevis

● Axial foot type

● With forward lock (UCAC2-F)

● With reverse locking (UCAC2-B)

Note 1: 5.5 for T8H/V switch, 13.5 for T2/3W switch.
 Note 2: 3.5 for T8H/V switch, 11.5 for T2/3W switch.

Symbol	A	(B)	C	(D)	E	F	L	LL	X
Bores size (mm)									
ø50	60	63	30	50	60	61	141	172	253

ø50	8.5	10.5	50	61
ø63	8.5	10.5	56	63

* Check the direction of the tie rod.

Dimensions

● Toggle bracket dimensions

Note 1: This can not be assembled to standard models because the rod projection dimensions is different.

Note 2: This is the dimensions for when the rod is projected. B dimension indicates the knuckle pin center position at rod retracted.

Note 3: The dimensions is same with bellows.

Note 4: This product is installed by welding.

CAC4/UCAC2 Series

Accessory dimensions

- Rod eye dimensions
ø40 to ø63

Material: Steel

* A spring pin is attached.

Model no.	A	Applicable clamp	Weight (kg)
CAC4-IB	19.5 ^{+0.1} _{-0.4}	CAC4-A and CAC4-B UCAC2-A and UCAC2-B	0.27

- Rod clevis steel (Y1) dimensions
ø40 to ø63

Material: Steel

* A pin, split pin, spring pin and a plain washer is attached.

Model no.	A	Applicable clamp	Weight (kg)
CAC4-Y1A	16.5 ^{+0.3} ₀	CAC4-A and UCAC2-A	0.37
CAC4-Y1B	19.5 ^{+0.3} ₀	CAC4-B and UCAC2-B	0.37

- Clevis pin dimensions
ø40 to ø63

Material: Steel

* Split pin and plain washer is attached.

Model no.	Applicable clamp	Weight (kg)
CAC4-P	CAC4-A and CAC4-B UCAC2-A and UCAC2-B	0.05

- Limit switch mounting bracket dimensions

Material: Steel

- Dog bracket dimensions

Material: Steel

ø40 to ø63

- Rod clevis steel (Y) dimensions
ø40 to ø63

Material: Cast iron

* A pin, split pin, spring pin and a plain washer is attached.

Model no.	A	Applicable clamp	Weight (kg)
CAC4-YA	16.5 ^{+0.3} ₀	CAC4-A and UCAC2-A	0.37
CAC4-YB	19.5 ^{+0.3} ₀	CAC4-B and UCAC2-B	0.37

ø80

* A pin, split pin, spring pin and a plain washer is attached.

Model no.	Applicable clamp	Weight (kg)
CAC4-Y1-80	CAC4-A and CAC4-B	0.95

ø80

* Split pin and plain washer is attached.

Model no.	Applicable clamp	Weight (kg)
CAC4-P-80	CAC4-A and CAC4-B	0.15

- Please use a limit switch interchangeable with WLH2 (Omron)

Model no.	Part name	Applicable clamp	Weight (kg)
CAC4-L	Limit switch mounting bracket	CAC4-A and CAC4-B	0.18
CAC4-D	Dog bracket	UCAC2-A and UCAC2-B	0.08

Specifications

Model no.	T2YDU
Descriptions	
Applications	Programmable controller DC
Switch polarity	Not polarized
Light	Red/green LED (Lit when ON) (Refer to drawing -1)
Load voltage	24 VDC \pm 10%
Load current	5 to 20mA DC
Internal voltage drop	6V or less
Leakage current	1.0mA or less
Lead wire	Flame resistant cabtire cord with cable connector 0.5 mm ² , 2 conductors
Insulation resistance	100M Ω and over with 500 VDC megger
Withstand voltage	No failure impressed at 1000 VAC for one minute
Maximum shock resistance	980m/s ²
Output delay time (ON and OFF delay)	30 to 60ms
Ambient temperature	-10 to + 60°C
Storing temperature	-20 to + 80°C
Protective structure	JIS C0920 (water tight type), IP67, oil resistant

Related products

Pilot operated 3, 5 port valve

Plug-in block manifold W4G2 Series

Advanced friendliness to people and the environment from the "4G^A·MN4G^B Series"

- Improved environmental design
 - Flame resistant cable cord with cable connector 0.5 mm², 2 conductors
 - Material name is displayed on main resin parts.
- Works in tougher environment.
Protective structure IP65
- Easier to use
 - Plug-in method for an easier valve replacement.
 - Wiring connectors eliminates the task of wiring necessary when adding manifolds (DC spec.)
- Driving cylinder up to $\varnothing 80$ at valve depth 15mm
New 3·5 port reduced wiring valve with safety functions

Catalog No. CC-654

Plug-in/manifold W4G4 Series

- Power consumption reduced 40%
 - 1W coils cuts energy consumption.
- Footprint down 30%
 - Substantially downsized by reducing valve width and length
- Easily add valves
 - You can add valves easily thanks to the connectors installed between manifold blocks.
- Arrange wiring blocks flexibly.
 - Wiring block can be set on left or right side of the manifold
- Improved safety and reliability
 - Rubber cover installed on the manual button prevents foreign materials, etc., from being caught to prevent malfunctions

Catalog No. CC-845

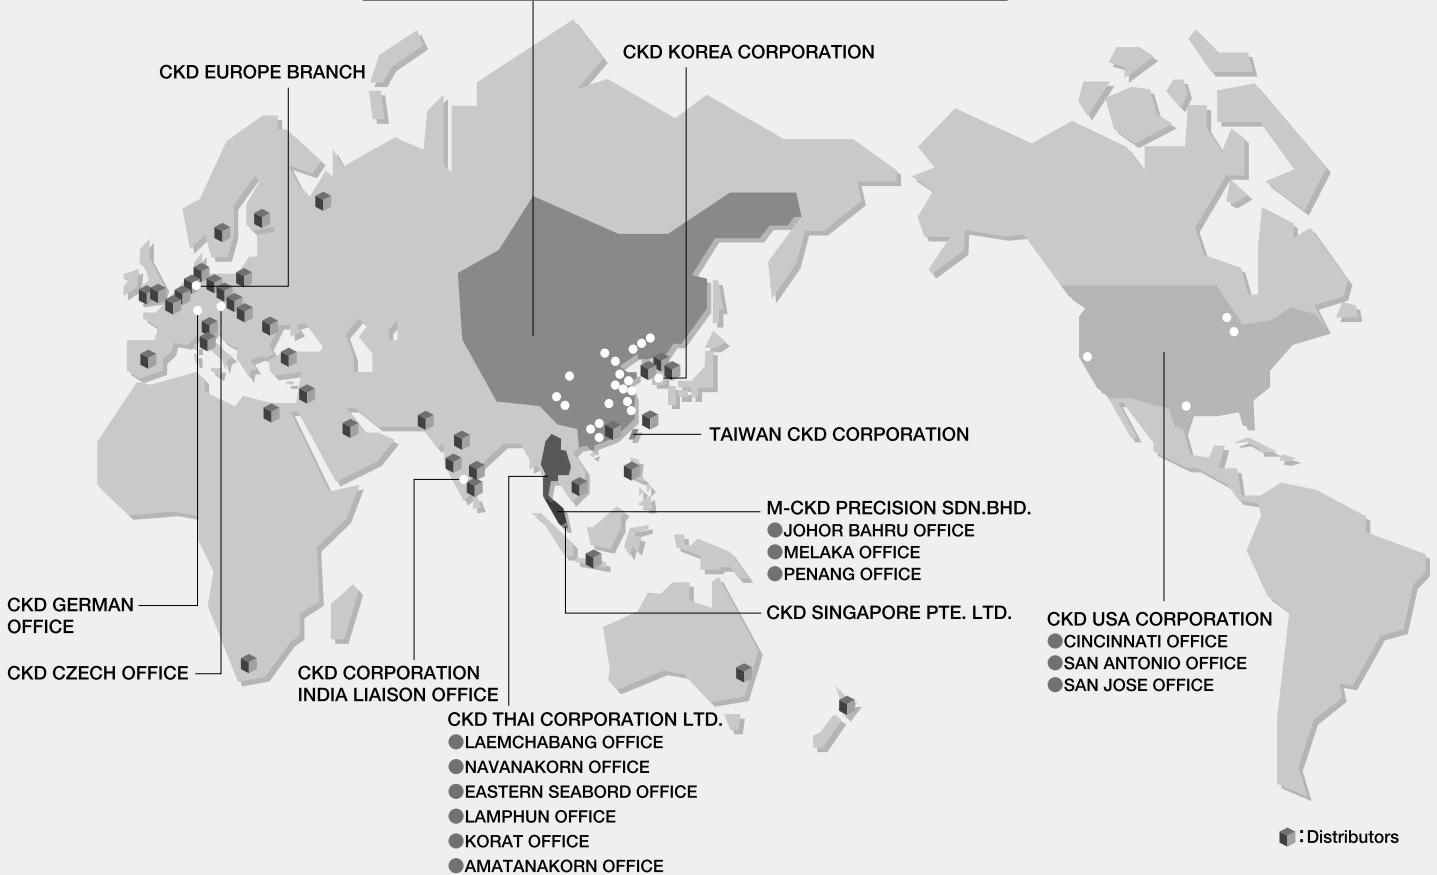

ISO compliant valve PV5G/PV5/CMF Series

- Compact body size
 - Improved overall performance including smaller size.
- Easy operation
 - Ideally placed manual button and power indicator light for improved operability
- 2 color indicator light
- Improved reliability and safety
 - Thanks to rubber cover installation over manual button, catching contaminant, etc., is prevented, and malfunction is eliminated.
- Easy and efficient piping
 - The valve body is not projected from the base, allowing you to pipe it more efficiently.

Catalog No. CC-824
